After 200 years: is sand conserved, has the groin levelled off, and is it stable?
Sand conserved?
Still growing?
Stable?
(a)
(b)
(c)
Net sand change at year 200 (m of summed shoreline)
Gap change, years 150-200 (m)
Steepest shoreline angle, any face, any year (°)
Shoreline orientation (°)
reference
Source/sink (dipole)
Trapping, pinned
Trapping, drift
Trapping, corrected
Corrected, with length
