The corrected groin on the Buxton shoreline
(a)
Where does the sand go?
Shoreline change against no groin
(m, seaward +)
GIS domain (south → north)
(b)
How big a step does the groin hold?
GIS 6 minus GIS 5, against no groin
(m, updrift seaward +)
Model year (0 = 1996 start)
(c)
Is sand conserved?
Sand gained across the island
(m of summed shoreline)
Model year (0 = 1996 start)
(d)
How much does each module move?
Shoreline moved per year (m)
Model year (0 = 1996 start)
Trapping, pinned
Trapping, drift
Trapping, corrected
year 30 (a)
year 10 (a)
corrected: leak returned (d), correction with no groin (c)
