Unmodified BRIE, alongshore step only: where its sand budget holds and where it does not
Gentle bump: start and year 50
Sharp step: start and year 50
The island's total sand, nothing added
(a)
(b)
(c)
start
year 50, one rate per boundary
year 50, BRIE as written
Shoreline (m), + seaward
domain (500 m each), south → north
domain (500 m each), south → north
Sand made (+) or lost (−)
(m of summed shoreline)
Year
-118 m of shoreline
≈ -1.2 million m³
straight, BRIE as written
gentle bump, BRIE as written
sharp step, BRIE as written
sharp step, one rate per boundary
